

Name: Rohan Mehta

Age: 20
Education: SY BTech
Hometown: Pune
Family: Lives with parents and younger sister
Occupation: College Student

“I just want a decent hotel without spending half my trip budget on it.”

Goals

- **Find affordable hotels.**
- **Stay close to tourist places or public transport.**
- **Check ratings and reviews before booking.**
- **Get free cancellation if possible**

Frustrations

- Prices increasing after selecting a room.
- Too many hotel options to go through.
- Hidden taxes or extra charges.
- Expensive hotels appearing at the top.

Rohan is planning a 3-day trip with his friends. He opens Booking.com and filters hotels by price, rating and location. He mainly checks the final price, reviews and cancellation policy before making a decision.

Name: Aditya Shah

Age: 28
Education: MBA
Hometown: Ahmedabad
Family: Lives with his parents
Occupation: Sales Exec.

“I don't have time to compare twenty hotels. Just show me the ones that actually fit my requirements.”

Goals

- **Find hotels quickly**
- **Stay near his workplace or meeting location**
- **Have reliable Wi-Fi and breakfast**
- **Get flexible cancellation options**
- **Complete bookings with minimum steps**

Frustrations

- Spending too much time comparing hotels
- Poorly organised filters
- Important facilities being difficult to find
- Complicated cancellation conditions

Aditya travels to different cities for work several times a month. He searches by location, checks the rating and facilities, and usually books one of the first suitable options.

Name: Neha Sharma

Age: 36
Education: B.Com
Hometown: Mumbai
Family: Husband and wo children
Occupation: HR Manager

“When I'm travelling with my kids, I need to know exactly what I'm getting before I book.”

Goals

- **Find family-friendly hotels**
- **Check room size and sleeping arrangements**
- **Find hotels with breakfast and good facilities**
- **Read genuine guest reviews**
- **Stay in a safe and convenient location**

Frustrations

- Misleading or incomplete room photos
- Not knowing whether extra beds are available
- Complicated room policies
- Having to open multiple pages to compare hotels

Neha is planning a family holiday during her children's school vacation. She checks photos, reviews, room details and facilities before booking, and prefers convenience over the cheapest option.

Name: Kunal Verma

Age: 25
Education: BBA
Hometown: Delhi
Family: Lives with his parents
Occupation: Marketing Exec.

“I care more about the location and the overall experience than just finding the cheapest room.”

Goals

- **Find a well-rated hotel**
- **Stay close to restaurants and attractions**
- **Compare photos and reviews**
- **Find good deals**
- **Have an easy booking and cancellation process**

Frustrations

- Too many promotional labels
- Difficult comparison between similar hotels
- Reviews taking time to go through
- Important information being mixed with advertisements

Kunal and his partner are planning a weekend trip. They compare location, review score, photos and price, then shortlist two or three hotels before choosing the best overall value.

Name: Sunil Deshmukh

Age: 52
Education: B.A.
Hometown: Nashik
Family: Wife and son(Adult)
Occupation: Business owner

“I don't want to keep searching everywhere. Everything I need should be easy to find.”

Goals

- **Find a comfortable and reliable hotel**
- **Prefer hotels with good reviews**
- **Check location and transport access**
- **Understand the cancellation policy**
- **Complete the booking without confusion**

Frustrations

- Too many options on one page
- Small text and crowded hotel cards
- Complicated filters
- Unclear prices or additional charges

Sunil is planning a trip with his wife. He prefers using a laptop and spends more time checking reviews, location, room details and cancellation policies. He is willing to pay slightly more for a hotel that feels trustworthy
